

Medical Certificate - SARS-CoV-2 testing result

This is to certify that:

Name:
Current Address:
Country of residence:

Has been tested for the presence of SARS-CoV-2 on:

Date:
Time:

Status report of infection on the date of the test:

Date of report:
Testing result: Neg: Pos:

Date:	Signature and seal of the medically trained healthcare professional:
-------	--

Date:	Signature:
-------	------------

Valid proof of a negative COVID-19 test can be:

- a certificate issued by a health services provider.
- a certificate filled in and signed by a healthcare professional.
- a certificate filled in and signed by a person who has been trained, appointed and authorised to supervise swabbing and the processing of swabs in connection with supervised COVID-19 antigen testing within fields like the educational sector in Denmark.

A COVID-19 test certificate filled in by the person tested or a close relative is not valid. Therefore, DIY testing kits available in supermarkets and other shops will not be recognised as valid proof of a negative COVID-19 test.
